Cyclotron

Gamma-Service Recycling GmbH has its focus on the supply, recycling and transportation of radioactive materials in research, medicine and industry, the dismantling and decontamination of plants, radionuclide laboratories and other facilities. Furthermore Gamma-Service Recycling GmbH is specialized in the recycling of ionisation smoke detectors and in the dismantling and processing of cyclotrons, linear and other accelerators.

Decommissioning of Linear Accelerators and Cyclotrons

DECOMMISSIONING OF CYCLOTRONS AND LINEAR ACCELERATORS

- On-site inspection and expert advice
- Radiological evaluation
- Coordination of the customer's institution and the responsible authorities
- Acceptance of the overall responsibility for radiation protection
- Decommissioning of cyclotrons and linear accelerators according to legal requirements
- Processing of activated components according to legal regulations
- Transport according to ADR regulations

Successful decommissioning of linear accelerators and cyclotrons of different manufacturers since 1999!

References:

Dismantling and takeover of activated parts of about 240 linear accelerators (e. g. Clinac, Mevatron, SL, etc.) since 1999 throughout Europe

Dismantling of electron circular accelerators (Betatrons) from radiation therapy including takeover of activated parts

Dismantling of cyclotrons, processing of material as well as clearance measurements of building structures
